### [Transport Management, Canteen Management etc.]

School Transportation Module provides the facility to manage school transportation records. This module can be customised. All corresponding records like how many vehicles in a particular route, how many students in particular vehicle and how many destinations in particular route and transportation fee per a particular destination. We offer realistic solutions to saving the school time and money.

Devices [RFID readers] can be installed on buses to collect data via RFID cards.

The Canteen module deals with the billing of all canteen items issued to student or staff. The rates of all items will be defined as per the category (student/staff) and the items issued to them are billed respectively. Bills can be reflected in their monthly fee, termly reports. Just like the transport module, the school can decide how they want to automate the process to suit its needs. The essence is effective monitoring.

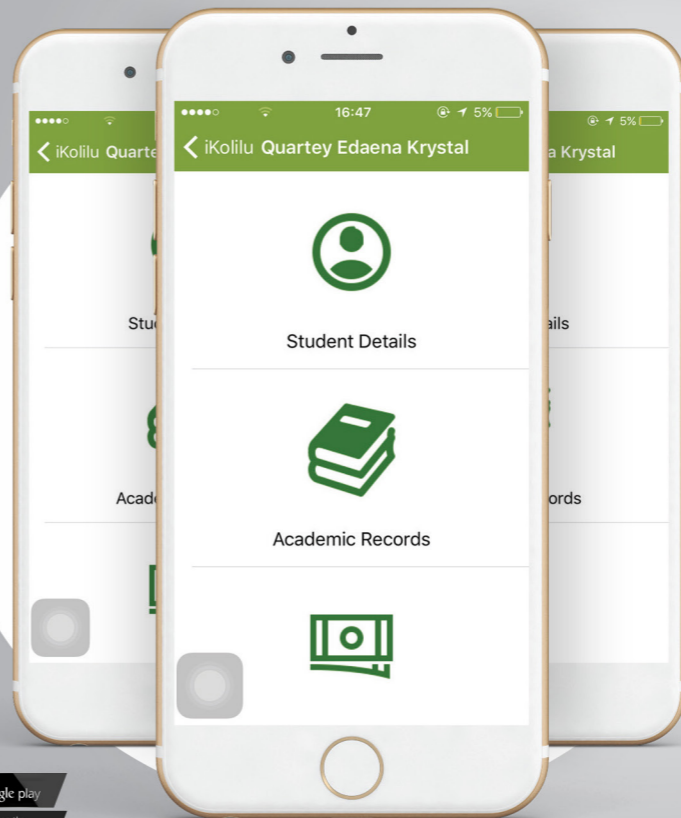

## iKolilu Portal

iKolilu Portal is our extended tool of iKolilu School Management System for parent, Teachers & Students to access instant, online, timely and secure student information about their academics work and issues that may affect them.
